skyscrapers architects pdf

A skyscraper is a continuously habitable high-rise building that has over 40 floors and is taller than approximately 150 m (492 ft). Historically, the term first referred to buildings with 10 to 20 floors in the 1880s. The definition shifted with advancing construction technology during the 20th century. Skyscrapers may host commercial offices or residential space, or both.

Skyscraper - Wikipedia

The Ruan Center is a high-rise office building located at 666 Grand Avenue in Des Moines, Iowa which was built by Ruan Transportation. The building was completed in 1975 and stands at a height of 459.68 ft (140m), and was the tallest building in Iowa until the completion of 801 Grand in 1991. The south side of the building's site was formerly occupied by The Chamberlain Hotel.
