Summit Agenda - Arab Future Smart Cities Summit

Smart growth is an urban planning and transportation theory that concentrates growth in compact walkable urban centers to avoid sprawl.It also advocates compact, transit-oriented, walkable, bicycle-friendly land use, including neighborhood schools, complete streets, and mixed-use development with a range of housing choices. The term "smart growth" is particularly used in North America.

Smart growth - Wikipedia

2:15 – 3:00 p.m. :: Vision, Leadership, and Collaboration for Smarter Cities. As we grow and redevelop our cities, being smart about the way we produce and consume energy, the way we get around, and how we manage the host of other core components of urban life is critically important to reducing carbon emissions and building resilience into our communities.

Utilities and Smart Cities ~ EUCI - Conference March 4-5

The U4SSC developed a set of international key performance indicators (KPIs) for Smart Sustainable Cities (SSC) to establish the criteria to evaluate ICT's contributions in making cities smarter and more sustainable, and to provide cities with the means for self-assessments in order to achieve the sustainable development goals (SDGs).
