In electronics and electrical engineering, a fuse is an electrical safety device that operates to provide overcurrent protection of an electrical circuit. Its essential component is a metal wire or strip that melts when too much current flows through it, thereby interrupting the current. It is a sacrificial device; once a fuse has operated it is an open circuit, and it must be replaced or ...

The Honda Beat is a rear wheel drive, mid-engined two-seat roadster kei car produced from May 1991 to February 1996. The Beat was the last car to be approved by Soichiro Honda before he died in 1991. The total number of cars produced was around 33,600. Most of the production (around two-thirds) occurred in the first year, and then production and sales fell drastically.
